

## Pretend Girlfriend - Separate Bedrooms

Apart from the sample at the start (which I can only assume was taken from Brookside or some other dramatic take on modern life), this is fairly standard rock/ Britpop. Actually, on more than one occasion, I closed my eyes and could see Noel Gallagher playing lead guitar. The lyrics tell a good story though - divorce is the start of a slippery slope to prostitution, via glamour modelling, apparently. I'm not quite sure if I believe that, but then I didn't believe Liam could walk faster than a cannonball either, and I still enjoyed the tune.
